## REPORT OF SCHOOL BOARD.

---

Eleven schools have been maintained during the year with a session of twenty-four weeks taught in each, divided into two terms of ten and fourteen weeks respectively. The whole number of pupils enrolled does not vary greatly from year to year, the past enrollment being 205. The average daily attendance of 156 indicates that every day which saw our schools in session found, on an average, forty-nine pupils, for good and sufficient reason or the reverse, absent. Judging from this fact, there are still those among us who regard the acquisition of an education as of very slight importance. In two of the schools the average attendance has fallen to the point where it is neither wise nor economical to longer maintain a separate school organization, and in order to secure the best results from the present law, another year may find it necessary to reduce the number of schools to nine or ten. There can be no reasonable ground of opposition to this course, as it is an established custom to use a portion of the school money to pay the cost of conveyance of those who may be placed at a disadvantage by reason of any rearrangement which, lessening the number of schools, increases the distance some will have to travel.

### TEACHERS.

We have employed during the year fourteen different teachers, and the average monthly wages paid them has been \$25.95. This rate is in excess of the average paid at any time since the present law went into effect, and there is every reason to believe that the coming year may find it necessary for us to pay an even higher rate than this. It should be borne in mind that other towns, not

lacking in enterprise, are striving to retain for their schools teachers of first-class merit, and if it is the desire of the district that we should secure the services of such, the revenue necessary to accomplish this object must be forthcoming.

#### NEW SCHOOLHOUSE AT PATTEN HILL.

In our last annual report we took occasion to call your attention to the dilapidated condition of the Patten hill schoolhouse, and urged the importance of an appropriation sufficient to defray the expense of repairing the same. The town failed to act upon our suggestion, thus obliging us to use the buildings for another year. In cold or windy weather the house is scarcely habitable, and to use it longer without first making extensive and costly repairs upon it would be an experiment fraught with so much danger to the health of the pupils that the board will not feel warranted in taking the risk. Hence should no provision be made at the annual district or town meeting for putting this schoolhouse in a safe condition to be used the board will deem itself justified in seeking quarters elsewhere for the school. Without a doubt the house could be repaired for a less sum of money than it would cost to build a new one, but past experience would seem to indicate that greater economy could be secured and better satisfaction result from the erection of a new building.

#### REPAIRS.

No very extensive repairs have been made on the school buildings the past year. The Hill schoolhouse has been painted and minor repairs made on some of the others. For the coming year, the Chester road schoolhouse should be painted, and the underpinning reset under the High street school buildings. All the other schoolhouses, with the exception already noted, are outwardly in an excellent state of repair.

In a former report your attention was directed to the unsatisfactory condition of our schoolrooms, and the hope was expressed that we might be able in the near future to do something to render them less cheerless and unattractive. It is greatly to be regretted that the year has gone by without much having been ac-

complished in this direction. In the matter of furnishing our schoolhouses with modern seats and desks we are far behind other towns about us, and if from no higher motive than local pride we should make an effort to get rid of the old-time benches and desks which have been a source of discomfort to the school children for so many years. The seats and desks of modern manufacture are exceedingly well adapted to the purpose for which they are designed and are, moreover, models of beauty and convenience. The expense of fitting out a schoolhouse with them would vary in cost from \$60 to \$90 or more.

#### FLAGS.

The beautiful custom, now so common throughout the country, of placing the national flag on our schoolhouses cannot fail to inspire the children with a love for their country and its flag, and as our government finds its surest safeguard in the common schools of the land, it is fitting and proper that the national emblem should float over them. In our own town six of the eleven schoolhouses are provided with flags obtained through the efforts of the teachers and pupils in each district. It affords us much pleasure to say in this connection that solicitations in aid of this good work have invariably met with a generous response.

#### COLUMBUS DAY.

The 21st day of October, 1892, which marks the four hundredth anniversary of the discovery of this country by Columbus, was set apart by the general government as a national holiday, and the school children of the land were intrusted with the work of celebrating the day in a manner befitting so important an event. In our town schools the exercises on this occasion were appropriate in character and well carried out. In some of the districts flags were raised over the schoolhouses, and at the Island, where an elaborate program was presented, the teacher and pupils of the Village school were present and assisted in this patriotic task. In the evening of that day the people of the town were entertained by exercises held in the vestry of the Congregational church, conducted by the teachers and pupils of the fol-

lowing schools : Hill, Corner, Chester road, High street, West Candia, and South road.

#### TEXT-BOOKS.

That the expense incurred for text-books purchased during the year is so largely in excess of the amount expended in former years is due to the fact that the sum paid out includes the cost of seven complete charts purchased two years ago at a cost of \$112. The children in our schools are now well supplied with text-books of excellent merit, and as subsequent purchases will be required only to make good the loss resulting from the wear and tear incident to their use, the expense to the town in the future will be light. It may be said that our supplies and text-books have been purchased on exceedingly favorable terms, and at prices far below what was paid under the old system.

#### CONCLUSION.

The school year covered by this report has been one of great prosperity, unmarred by any disturbance or trouble in the schools, and, on the part of the teachers, characterized by conscientious thoroughness in all departments of their work. That all did not succeed in the same degree was not the result of lack of interest or failure to realize the grave responsibilities of their calling, but came rather from a want of those qualifications which experience alone can supply.

Perhaps the most unsatisfactory feature of the past year's work has been the failure of those having children in their charge to enforce regularity of attendance. In our rural schools there are natural causes which operate to reduce the daily attendance, such as remoteness from the school, inclement weather, and bad state of the roads. It is feared, however, that many of the cases of absenteeism can be traced directly to the parents, who from motives of selfishness retain their children at home to work, or from indifference allow them to decide for themselves whether they will attend or not. The school board can insist on an attendance of twelve weeks during the year, but beyond this they are powerless to act. It is believed that this evil, so deplorable in

its consequences and so difficult to overcome, can be best remedied by increasing the time of compulsory attendance from twelve weeks to eighteen or twenty.
